

**2004/05 RESEARCH PROGRAMME**

<b>Project Description</b>	<b>Funding 2004/05</b>
<b>Johne's Disease: Epidemiology</b>	<b>\$85,100</b>
Johne's Disease: diagnostic tools and vaccine development	\$75,000
Heritable resistance to Tb in deer	\$75,000
Contribution to Greenhouse Gas Mitigation Research Consortium	\$35,000
<b>Strategies to achieve early calving</b>	<b>\$40,000</b>
Contribution to Pastoral Genomics Consortium	\$30,000
Pasture Quality Learning Package	\$30,000
Post-Grad Support	\$25,000
Leptospirosis	\$25,000
<b>Lactation PhD</b>	<b>\$15,000</b>
<b>Johne's Disease – research into other pan-industry issues</b>	<b>\$15,000</b>
<b>Venison Processing and Product Quality</b>	<b>\$15,000</b>
<b>Understanding barriers to adoption of improved land-use practices</b>	<b>\$15,000</b>
<b>Valuing genetic gain for commercial deer production</b>	<b>\$12,000</b>
<b>Recovery of streams after prevention of wallowing</b>	<b>\$10,000</b>
<b>Impact of tress on mitigating soil and pasture damage</b>	<b>\$10,000</b>
<b>Adopting OVERSEER (nutrient budgeting) for deer</b>	<b>\$10,000</b>
<b>Contribution to pan-industry programme on Clover Root Weevil</b>	<b>\$10,000</b>
<b>Improving reproduction by providing a tool for assessment of wapiti hybridisation</b>	<b>\$8,000</b>
<b>TOTAL</b>	<b>\$540,100.00</b>

Notes: Projects in bold represent new projects commencing in the 2004/05 year.

These projects are spread across DEERResearch's 7 Goal Areas as follows:

Technology Transfer	\$30,000	6%
Productivity Gains	\$70,000	13%
Sustainable Production	\$80,000	15%
Deer Health and Welfare	\$185,100	34%
Market Access and Development	\$105,000	19%
New Technologies	\$30,000	6%
Capability Building	\$40,000	7%
