

**SOUTHLAND  
FARMING FOR PROFIT FIELD DAY**

# Built for Southland

**Tuesday 10 March, 1.00pm - 4.30pm**

**Wakefield Farm (woolshed), 194 Dipton Bush Road, Dipton**

Join us for an on-farm field day at John, Will and Erin Lindsay's Wakefield Farm, exploring how integrating sheep, beef, and deer can improve profitability and resilience.

### About the day

This event isn't about reinventing your system - it's about building on your existing strengths. Whether you farm one species or several, there will be practical takeaways you can apply to your own operation.

We'll be joined by **Matthew Carroll** (BakerAg), an experienced farm consultant, who will unpack historical trends in integrated systems and the Lindsay family's financial performance across their species mix.

### What you will learn

- More consistent, year-round cashflow.
- Improved workload balance.
- Animal health advantages.
- Practical insights to strengthen long-term business sustainability.

A guided farm tour from hill country through to irrigated flats will showcase how the Lindsay family manage species integration across their landscape.

### Important notice - The Dipton Bridge is closed.

Access to Dipton Bush Road is via Centre Bush Bridge or Lumsden Bridge.

 Afternoon tea and BBQ provided. BBQ kindly sponsored by Halter

 Registration essential. To register visit [www.beeflambnz.com/events](http://www.beeflambnz.com/events) and search for your event or scan the QR code
